23. My doctor says I have to unhealthy food.				
A) cut down B) cut down on	C) cut on	D) cut up		
_ ,				
III. Reading				
in wild parts of Siberia. When the train comes to the station it can be there for hours or even days. There are about fifteen doctors on the train. They do their best to help people who live in small remote villages in Russia. These people can't meet with doctors in their hometowns. They become patients for a moment when the train comes to their place of living. They have appointments with doctors. It is even possible to do their blood tests there. The train has its laboratory for blood and urine tests and medical testing machines like x-rays. However, it can't offer surgery. If someone should undergo operations, the person has to go to hospital. The patients appreciate the doctors on the train. They claim they are reliable and good at their jobs. The train was named after a famous Russian doctor who lived in the nineteenth century. Nowadays, the Matvei Mudrov visits each town or village on the BAM twice a year.
